Product Safety Statement

The recent era is characterized by the growing concern over the spread of the CoronaVirus (COVID-19) and uncertainty.

We at Jojoba Desert wish to relieve any concerns regarding the safety of JD Jojoba Oils and products.

We hereby declare that our production line is fully automated and is safe and free from the threat of exposure to any microbial contamination, including the CoronaVirus.

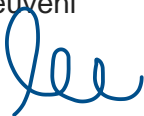

The entire oil production process, from cultivation to the final product and packaging, is done in Israel, without human contact, under completely aseptic conditions.

Jojoba Desert transfers sufficient stock to its warehouses world wide (USA, Netherlands and China) in order to assure its partners and customers stable and quick supply.

We wish all our customers across the sea: good health, well-being and prosperity. We hope that the current threat will quickly pass and we will soon be able to meet again, shake hands, and leave this worry behind.

With Best Regards,

Lee Reuveni
